A New Type of Review Journal

Cold Spring Harbor Laboratory Press announces the launch of a new monthly online publication, *Cold Spring Harbor Perspectives in Biology*. Spanning the complete spectrum of the molecular life sciences, the journal offers article collections that comprehensively survey topics in molecular, cell, and developmental biology, genetics, neuroscience, immunology, cancer biology, and molecular pathology. Written by leading researchers and commissioned by an eminent board of editors, subject collections grow with every issue of the journal. *Cold Spring Harbor Perspectives in Biology* is thus unmatched in its depth of coverage and represents an essential source for informed surveys and critical discussion of advances in emerging areas of biology.

Scope: Molecular Biology, Cell Biology, Developmental Biology, Genetics, Neurobiology, Molecular Pathology

Monthly, online

ISSN: 1943-0264

Subject Coverage

Angiogenesis	The Extracellular Matrix	Mechanotransduction	Prokaryote Cell Biology
Antigen Receptor Diversification	The Endoplasmic Reticulum	Membrane Fusion and Exocytosis	Protein Homeostasis
Apoptosis	The Evolution of Gene Networks	Mitochondria	Receptor Tyrosine Kinases
Auxin Signaling	Generation and Interpretation of Morphogen Gradients	Mitosis	Recombination Mechanisms
Axonal Guidance	Germ Cells	Molecular Motors	Regeneration
The Biology of Cardiovascular Disease	The Golgi Apparatus	Muscle Cell Biology	The RNA World
The Biology of Schizophrenia	G-Protein-Coupled Receptors	The NF- κ B Family	Sex Determination
Calcium Signaling	Immune Cell Signaling	Nuclear Hormone Receptors	Symmetry Breaking in Biology
Cell–Cell Junctions	Immune Tolerance	The Nucleus	Synapses
Cilia and Flagella	Lipid Cell Biology	The Origin of Life	Transcriptional Regulation
The Cytoskeleton	Lymphocyte Cell Biology	The p53 Family	Wnt Signaling
DNA Damage and Repair	Mammary Gland Biology	Prions	The Y Chromosome

Superior siRNA for on-target specificity and guaranteed silencing.

Thermo Scientific Dharmacon ON-TARGET^{plus} siRNA reagents incorporate the most sophisticated strategy available for enhancing silencing specificity and reducing off-target effects up to 90%.

- The only siRNA with modifications to reduce off-targeting caused by sense and antisense strands
- The most comprehensive bioinformatics to reduce seed region-related off-target effects
- Available as gene families, custom collections, or a whole human genome library!

Learn More Today

For more information, call 800-235-9880 or check out our website for additional information: www.thermo.com/otp

The most specific siRNA available.

ON-TARGET^{plus}® dual-strand modifications are superior in reducing off-targets. Five genes were targeted with unmodified, sense strand-modified, or ON-TARGET^{plus} siRNAs. Off-targets were quantified by microarray analysis.

MAXimize Your DNA Isolation

Our MagMAX™ family of nucleic acid purification products has grown. Introducing MagMAX™ DNA Multi-Sample Kits from Applied Biosystems. The same easy-to-use, reliable magnetic particle technology that powers our MagMAX™ RNA isolation kits is now available for DNA purification.

- **High yields of highly pure DNA**—for use in routine or stringent downstream applications
- **Compatible with a wide range of sample types**—purify DNA from samples such as blood, tissue, and cultured cells
- **Ideal for genetic analysis workflows**—including genotyping, sequencing, and high-resolution melting analysis

Automate it! All MagMAX™ Kits are easily adapted to many automated platforms, including MagMAX™ Express instruments.

Find performance data and product specifications on the complete line of MagMAX™ kits and instruments at www.appliedbiosystems.com/magmax.
