

more high-quality RNA

Get the most RNA for your money without compromising on quality. For orders at an identical synthesis scale and comparable price to other suppliers, Thermo Scientific custom RNA synthesis gives you **three to five times (or more!)** the amount of RNA. When you compare yields instead of synthesis scales, you'll find that our synthesis chemistry can provide you with tremendous savings. Trust the RNA experts to meet your needs when quality and value are equally important.

for your money

High-throughput RNA analysis

RQN provides quality measurement

RNA research is the **new frontier** of discovery in life science. Labs that once analyzed dozens of RNA samples a week may now analyze hundreds or even thousands.

The Fragment Analyzer's **single dilution step** for RNA sample prep, coupled with parallel automated separation, achieves high-throughput. One dilution – in either **12- or 96-sample formats** – and it's ready to go.

RQN means **RNA Quality Number**. Derived from PROSize® analytical software, RQN assesses the quality or **integrity** of total RNA on a scale of **1-to-10**, and allows for **correlation to legacy data**.

Every once in a while, a new product comes along that changes how people work. *Find out for yourself.*

ZYMO RESEARCH

The Beauty of Science is to Make Things Simple

Handcuffed to your pipette?

Free yourself!

The Apollo 324™ system automates library preparation for all major NGS systems, so you can spend your time on more important things. Setting up and starting a run takes only 15 minutes of hands-on time.

Then you are free.

Our PrepX™ reagent kits generate consistent, quality libraries for Ion Torrent PGM™, Roche 454™ GS FLX Titanium™, FLX+ and GS Junior™, and all Illumina® platforms. Color-coded reagent kits — for DNA, RNA and ChIP-seq applications — minimize errors and simplify instrument setup. Pre-aliquoted strips let you set up full or partial runs with no reagent waste.

A NEW STANDARD IN RNA ISOLATION

RNAzol[®] RT^{*}

THE HIGHEST YIELD AND PURITY:

Isolates total RNA, with mRNA
and small RNA (200-10 bases)
in separate fraction

- ▶ The single-step method without phase separation
- ▶ No DNase treatment necessary
- ▶ RNA ready for RT-PCR, microarrays and other applications
- ▶ No need for refrigerated centrifuge
- ▶ One reagent for solid and liquid samples

ANNOUNCING

MOLECULAR CLONING 4

By **Michael R. Green**, Howard Hughes Medical Institute, University of Massachusetts Medical School and **Joseph Sambrook**, Peter MacCallum Cancer Institute, Melbourne, Australia

Molecular Cloning: A Laboratory Manual has always been the one indispensable molecular biology laboratory manual for protocols and techniques. The fourth edition of this classic manual preserves the detail and clarity of previous editions as well as the theoretical and historical underpinnings of the techniques presented. Ten original core chapters reflect developments and innovation in standard techniques and introduce new cutting-edge protocols. Twelve entirely new chapters are devoted to the most exciting current research strategies, including epigenetic analysis, RNA interference, genome sequencing, and bioinformatics. This manual is essential for both the inexperienced and the advanced user.

Attention RNA Researchers: Apply for Research Grants

THE MICHELSON GRANTS

The Foundation seeks proposals for up to **\$250,000** per year for up to 3 years of funding for research in pursuit of permanent contraceptives for male and female cats and dogs.

The first step in the Michelson Grant process is submission of a Letter of Intent (LOI).

For further details, visit: <http://michelson.foundanimals.org>.

THE MICHELSON PRIZE

A **\$25 million prize** will be awarded to the first entity to provide to Found Animals a safe, effective, and practical non-surgical sterilant for use in cats and dogs.

The winning entry for the Michelson Prize in Reproductive Biology must meet the following criteria:

- Single dose, permanent non-surgical sterilant
- Safe and effective in male and female cats and dogs
- Ablates sex steroids and/or their effects
- Suitable for administration in a field setting
- Viable pathway to regulatory approval
- Reasonable manufacturing process and cost

**MICHELSON
PRIZE & GRANTS**

The Michelson Prize & Grants is open to any entity from any nation. Found Animals encourages scientists from a diverse range of fields to compete for the Michelson Prize & Grants.

For more information about the Michelson Prize & Grants, visit:
<http://michelson.foundanimals.org>

Accurate expression data from treasured
10+ year-old FFPE samples.

Discover more from treasured FFPE samples.

SensationPlus™ FFPE Reagent Kit provides a robust RNA amplification and labeling method for whole-genome expression profiling and biomarker discovery and validation from archived FFPE samples.

- Lower sample input requirements—as little as 20 ng
- Superior correlation between archived FFPE and fresh frozen samples—successful with samples even older than 10 years
- Validated on proven microarrays for biomarker discovery—GeneChip® Human Genome U133 Plus 2.0 Array and Almac Xcel™ Array

To find your accurate expression data using SensationPlus FFPE Reagent Kit, visit www.affymetrix.com/sensationplus.

Biologically relevant data is achievable with SensationPlus FFPE Reagent Kit and FFPE samples.

Breast cancer versus normal adjacent 8-year old samples.
