Hypothesis

Mathematical modeling of combinatorial regulation suggests that apparent positive regulation of targets by miRNA could be an artifact resulting from competition for mRNA 307
Dimpal Nyayanit and Chetan J. Gadgil

Bioinformatics

Unexpected selection to retain high GC content and splicing enhancers within exons of multiexonic lncRNA loci 320[OA]
Wilfried Haerty and Chris P. Ponting

RNAMotifScanX: a graph alignment approach for RNA structural motif identification 333
Cuncong Zhong and Shaojie Zhang

Articles

Arginine methylation and citrullination of splicing factor proline- and glutamine-rich (SFPQ/PSF) regulates its association with mRNA 347[OA]
Ambrosius P. Snijders, Guillaume M. Hautbergue, Alex Bloom, James C. Williamson, Thomas C. Minshull, Helen L. Phillips, Simeon R. Mihaylov, Douglas T. Gjerde, David P. Hornby, Stuart A. Wilson, Paul J. Hurd, and Mark J. Dickman

Relationship between nucleosome positioning and progesterone-induced alternative splicing in breast cancer cells 360
Camilla Iannone, Andy Pohl, Panagiotis Papasaikas, Daniel Soronellas, Guillermo P. Vicent, Miguel Beato, and Juan Valcárcel

A deeply conserved, noncanonical miRNA hosted by ribosomal DNA 375
Li-Ling Chak, Jaaved Mohammed, Eric C. Lai, Greg Tucker-Kellogg, and Katsutomo Okamura

MicroRNA-130a can inhibit hepatitis B virus replication via targeting PGC1α and PPARγ 385
Jyun-Yuan Huang, Shu-Fan Chou, Jun-Wei Lee, Hung-Lin Chen, Chun-Ming Chen, Mi-Hua Tao, and Chiaho Shih

(*continued*)

Cover Illustration: Crystal structure of the lariat-capping (LC) ribozyme (Protein Data Bank code: 4p9r; Meyer M, Nielsen H, Oliéric V, Roblin P, Johansen SD, Westhof E, Masquida B. 2014. Speciation of a group I intron into a lariat capping ribozyme. Proc Natl Acad Sci ***111:*** *7659–7664). Image details show RNA—ribbon-plate representation, base-specific coloring, A—red, U—magenta, G—green, C—blue. The image was generated with the Discovery Studio Visualizer. Cover image provided by the Jena Library of Biological Macromolecules—JenaLib (jenalib.fli-leibniz.de).*

Published by Cold Spring Harbor Laboratory Press

Structural basis for recognition of intron branchpoint RNA by yeast Msl5 and selective effects of interfacial mutations on splicing of yeast pre-mRNAs 401
Agata Jacewicz, Lidia Chico, Paul Smith, Beate Schwer, and Stewart Shuman

atBRX1-1 and atBRX1-2 are involved in an alternative rRNA processing pathway in *Arabidopsis thaliana* 415
Benjamin L. Weis, Denise Palm, Sandra Missbach, Markus T. Bohnsack, and Enrico Schleiff

Evolutionary conservation of a molecular machinery for export and expression of mRNAs with retained introns 426
Baomin Wang, David Rekosh, and Marie-Louise Hammarskjold

Prp40 pre-mRNA processing factor 40 homolog B (PRPF40B) associates with SF1 and U2AF^{65} and modulates alternative pre-mRNA splicing in vivo 438
Soraya Becerra, Marta Montes, Cristina Hernández-Munain, and Carlos Suñé

Method

Using droplet-based microfluidics to improve the catalytic properties of RNA under multiple-turnover conditions 458^{OA}
Michael Ryckelynck, Stéphanie Baudrey, Christian Rick, Annick Marin, Faith Coldren, Eric Westhof, and Andrew D. Griffiths
