

RNA

A PUBLICATION OF THE RNA SOCIETY

VOL. 25, NO. 4

APRIL 2019

CONTENTS

Review

- UPFront and center in RNA decay: UPF1 in nonsense-mediated mRNA decay and beyond 407^{OA}
Yoon Ki Kim and Lynne E. Maquat

Report

- Structure-guided design of a high-affinity ligand for a riboswitch 423^{OA}
Lin Huang, Jia Wang, Timothy J. Wilson, and David M.J. Lilley

Articles

- A viral RNA motif involved in signaling the initiation of translation on non-AUG codons 431
Miguel Angel Sanz, Esther González Almela, Manuel García-Moreno, Ana Isabel Marina, and Luis Carrasco
- Spontaneous advent of genetic diversity in RNA populations through multiple recombination mechanisms 453
Benedict A. Smail, Bryce E. Clifton, Ryo Mizuuchi, and Niles Lehman
- Assembly and early maturation of large subunit precursors 465
Malik Chaker-Margot and Sebastian Klinge
- Force measurements show that uL4 and uL24 mechanically stabilize a fragment of 23S rRNA essential for ribosome assembly 472
Laurent Geffroy, Thierry Bizebard, Ryo Aoyama, Takuya Ueda, and Ulrich Bockelmann
- Expanded CUG repeats in *DMPK* transcripts adopt diverse hairpin conformations without influencing the structure of the flanking sequences 481^{OA}
Remco T.P. van Cruchten, Bé Wieringa, and Derick G. Wansink

(continued)

Cover Illustration: Group I self-splicing intron P4-P6 domain mutant U131A (Protein Data Bank code: 6d8l; Shoffner GM, Wang R, Podell E, Cech TR, Guo F. 2018. In Crystallo selection to establish new RNA crystal contacts. *Structure* **26**: 1275–1283). The RNA intron backbone is displayed as an orange ribbon; bases are shown as blocks with NDB coloring: A—red, C—yellow, G—green, U—cyan. The image was generated using 3DNA/blocview and PyMol software. Cover image provided by the Nucleic Acid Database (ndbserver.rutgers.edu).

Bcd1p controls RNA loading of the core protein Nop58 during C/D box snoRNP biogenesis	496
<i>Arnaud Paul, Decebal Tiotiu, Benoît Bragantini, Hélène Marty, Bruno Charpentier, Séverine Massenet, and Stéphane Labialle</i>	

Method

Segmented poly(A) tails significantly reduce recombination of plasmid DNA without affecting mRNA translation efficiency or half-life	507
<i>Zeljka Trepotec, Johannes Geiger, Christian Plank, Manish K. Aneja, and Carsten Rudolph</i>	

RNA: Instructions for contributors	519
