

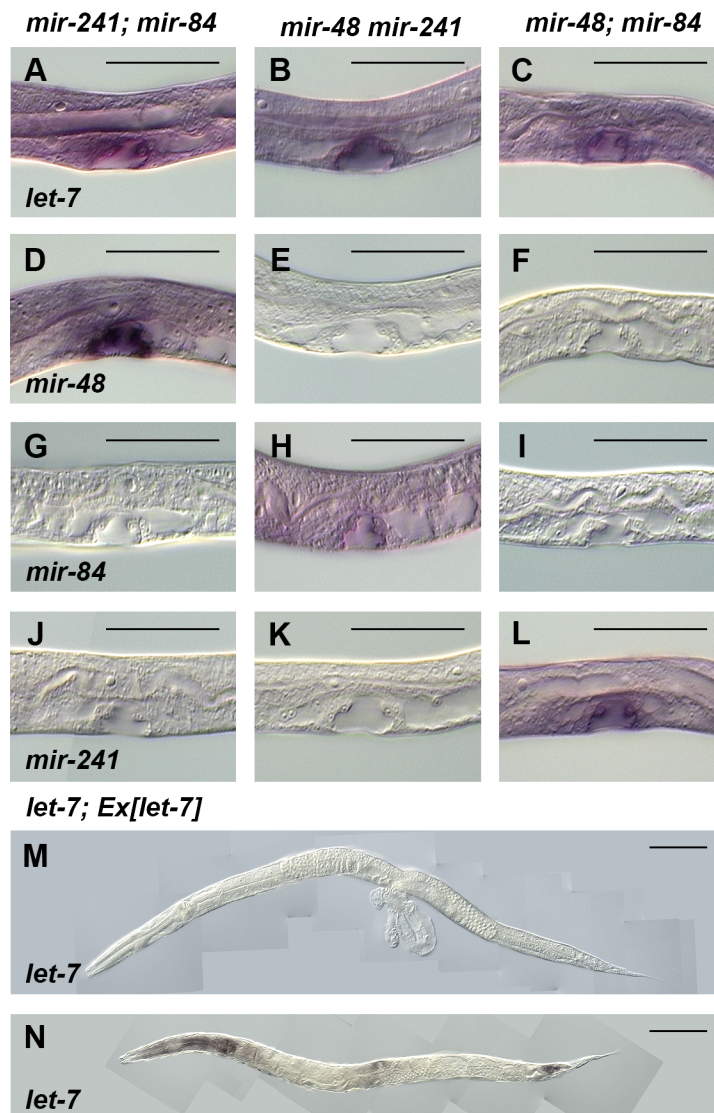

FIGURE S4. WISH analysis for detection of *let-7* family miRNAs in their deletion mutants. The family members are *let-7* (A-C,M,N), *mir-48* (D-F), *mir-84* (G-I), and *mir-241* (J-L). Genotypes are *mir-241; mir-84* (A,D,G,J), *lin-58 mir-241* (B,E,H,K), *lin-58; mir-84* (C,F,I,L) and *let-7; Ex[let-7]* (M,N). Images show the vulvae of larvae at the L4 stage (A-L), and the whole bodies of adults at the beginning of the stage (M,N). Scale bars, 50 μ m (A-L) and 100 μ m (M,N).
