

A Chromatin enhancer domains (8-10)

B ATAC-seq peaks

SUPPLEMENTAL FIGURE S2. Transcription at enhancer domains and ATAC-seq regions increases in *zfp-1* mutant animals compared to WT. Boxplots showing GRO-seq RPKM (Reads Per kb per Million Reads) values at chromatin domains (A) and ATAC-seq peaks (B) for *zfp-1(ok554)* and WT (L3) larvae. The p-values were determined by Wilcoxon rank sum tests (* and *** denote p-values < 0.05 and < 0.001, respectively).
