

Supplementary Figure 19. Differential cassette exon inclusion after *MBNL2* knockdown. RT-qPCR quantification of *APAF1*, *BPTF*, *FHIT*, *PIGN*, *PPIL3* and *SRSF6* cassette exon inclusion in normoxic and hypoxic MCF-7 cells. Values are normalized to the housekeeping gene *RPLP0* and to the total mRNA level (isoforms with or without the cassette exon). n = 3-5. (**) *P* value < 0.01, (*) *P* value < 0.05.
