

Supplementary Figure 6. MBNL2 protein level is increased under hypoxia. (A) Western blot analyses of MBNL2 protein level in normoxic and hypoxic A549 and MCF-7 cells. (B) Quantification of Western blots shown in (A) and in **Figure 4B**. In A549 cells both MBNL2 isoforms 38 and 40 were quantified. In MCF-7 cells only the induced MBNL2 isoform 40 was quantified. A549: n = 3. MCF-7: n = 4. (*) *P* value < 0.05.
