

Supplementary Figure 1

Supplemental Figure 1. Dideoxy sequencing of enriched and nuclear extract U1 snRNAs. Lanes 1 and 2 correspond to the U and G sequences in U1 snRNA. N refers to neutral RNA sequence, SR U to SRSF7 bound upstream, SR D to SRSF7 bound downstream, TIA U to TIA-1 bound upstream, TIA D to TIA-1 bound downstream, NE to nuclear extract U1 snRNA and Beads to eluate from beads that had no substrate RNAs attached to pull down U1 snRNA.
