

A16S category *S. acidocaldarius***B**23S category *S. acidocaldarius*

Fig. S16 | Relative and absolute quantification of rRNA intermediates in *S. acidocaldarius*.

A, The total number of reads per 16S or **B**, 23S category is visualised by a color-coded bar (direct cDNA: grey, PCR-cDNA: blue). Additionally, the relative percentage of each 16S and 23S category is shown in brackets (Compare Figure 5K,L).
