

SUPPLEMENTAL FIGURE 1 LEGEND

Figure 1: Side-by-side comparison of ssDNA1 and ssDNA2 each labeled separately with AZ680-DBCO or AZ488-DBCO. (A) Denaturing PAGE of ssDNA1 labeled separately with AZ680-DBCO or AZ488-DBCO, and ssDNA2 labeled separately with AZ680-DBCO or AZ488-DBCO. This gel was EtBr stained and imaged with an EtBr filter. (B) The same gel as in Panel A, before EtBr staining, imaged for AZ488 fluorescence. (C) The same gel as in Panel A, before EtBr staining, imaged for AZ680 fluorescence.

Supplemental Figure 1:
