

Supplemental Fig. S2

Supplemental Fig. S2. Comparison between Poly(I:C)-induced 5'-tDRs and ANG-induced 5'-tiRNAs in U2OS cells.

The length of Poly(I:C)-induced tDRs were compared with that of ANG-induced tiRNAs by (A) SYBR Gold staining and (B) northern blotting in U2OS cells. ANG-induced tiRNAs were obtained by *in lysate* RNA digestion method using recombinant human ANG. ANG was added at final concentrations of 1 nM, *10 nM or **100 nM.
