

Supplemental Fig. S3

Supplemental Fig. S3. RNase L produces 5'-tiRNA^{Cys}-like tDR^{Cys}.

Comparison between RNase L-induced 5'-tDR^{Cys} and ANG-induced 5'-tiRNA^{Cys}. (A) Northern blotting for tRNA^{Cys}-GCA. (B) Predicted cleavage sites of tRNA^{Cys} by ANG/RNase L. Red and blue arrowheads indicate the predicted sites of ANG-mediated and RNase L-mediated cleavage, respectively.
